

BI Advanced - Dimensional Modeling (II)

1 Day Course

Course Description

- The goals of the *Dimensional Modeling (II)* training course are:
 - To provide advanced techniques of dimensional modeling.
 - To set guidelines to design aggregated stars for improved query performance.
 - To obtain practical dimensional modeling experience through the labs included in the training.

Target Audience

- BI Consultants – raise dimensional modeling skills to advanced level
- IT Consultants – understand what is behind dimensional modeling with a hands-on training
- IT Project Managers – see the range of possibilities offered by BI and how to best provide information to the different user profiles

Topics Covered

- Many to many relationships
- Flattening ragged dimensions
- Aggregation

Pre-requisites

- Good dimensional modeling knowledge is needed to enroll this course.

Languages

- *Dimensional Modeling (II)* is offered in English and Spanish (training material is only available in English).
